Spring / Summer 2019 Catalog

TONY MITTON; ANT PARKER

Awesome Ambulances

MAY
Kingfisher

Juvenile Fiction / Transportation / Cars & Trucks

On Sale 5/7/2019

Ages 2 to 5

Board Book 20 pages

6.3 in H | 6.3 in W

Carton Quantity: 0

ISBN: 9780753474945

\$6.99 / \$9.99 Can.

A chunky board book packed full of emergency rescues from the bestselling *Amazing Machines* creators

Awesome Ambulances follows the animal team as they become paramedics zooming to the rescue. Join them as they respond to emergencies, find out what's inside an ambulance, and how paramedics take care of each patient. Each page is filled with details that machine-mad kids will love: sirens, flashing lights, stretchers, and much more!

From airplanes to fire engines, the internationally bestselling *Amazing Machines* series is the perfect way for children to learn about all sorts of vehicles! Each book introduces a new vehicle and the many jobs it can do. Bright, engaging artwork and simple, rhyming text combine to make these fantastic books for young children. Kids will love getting to know the friendly, animal characters who feature throughout the series and reading about their fast-paced adventures!

Tony Mitton began writing for children while still working as a primary school and special needs teacher. He now works full-time as a writer and sometimes performs his poems in schools and libraries. His main published work consists of collections of lyric and narrative poetry, and verse picture books illustrated by a range of illustrators. His picture books include *Down by the Cool of the Pool* (with Guy Parker-Rees) and *The Somethingosaur* (with Russell Ayto).

CREATED & ILLUSTRATED BY SIMON BASHER

Basher Basics: Space Exploration**MAY**

Kingfisher

Juvenile Nonfiction / Science & Nature / Astronomy

On Sale 5/21/2019

Ages 8 to 12

Trade Paperback 64 pages

7 in H | 7 in W

Carton Quantity: 0

ISBN: 9780753475065

\$8.99 / \$11.99 Can.

Now with updated space facts and information on the latest space missions and probes—just in time to celebrate the 50th Anniversary of the Apollo 11 Moon Landing!

From Basher, the illustrator who showed the periodic table in a whole new light and gave us his fresh spin on physics, astronomy, planet Earth, chemistry and more, comes a book that shines its light into out-of-this-world beings who make the universe tick.

Learn about the amazing research that is revolutionizing space exploration, from the pioneering space crafts and equipment known as 'Space Aces' that have been used to delve into deep-space exploration to the scientists known as 'The Outerplanetary Mob' that have not only taken voyages to space and back but have contributed to our understanding of the universe. Space Exploration is a compelling guide to developments at the very forefront of science – a must-read for anyone wishing to understand, and engage with, modern space.

Simon Basher is the creator and illustrator of dozens of best-selling concept books for children including The Periodic Table, Physics, Biology, and Astronomy. His characters bridge the gap between edgy Manga and the cuteness of Hello, Kitty! Basher's original artwork is regularly exhibited and sold in the UK, Europe, the US and Asia. Find out more at www.basherworld.com

Dan Green has written many of the titles in the Basher Science series. He studied Geology at Cambridge University.

Climb aboard for a journey into the fascinating world of trains!

Learn all about trains from the first railroads to today's incredibly high-speed trains, from steam engines through electric trains and into what the future might have in store. Taking you across continents, through tunnels, and over bridges, this is the perfect introduction for train-mad children.

Richard Blackwill is a lecturer in Publishing Studies at the City University, London, and an associate consultant in the Centre of International Publishing Studies at Oxford Brookes University, UK. In his spare time, Richard writes about trains, and is fascinated by all things locomotive.

CARYN JENNER

Walking on the Moon

JUNE

Kingfisher

Juvenile Nonfiction / Technology / Aeronautics,
Astronautics & Space Science

On Sale 6/11/2019

Ages 7 to 11

Hardcover with dust jacket 64 pages

12 in H | 9.5 in W

Carton Quantity: 0

ISBN: 9780753475003

\$14.99

Imagine you were there as the first human walked on the surface of the Moon!

Celebrate the 50th anniversary of the Apollo 11 Moon landing by reading about the people and events that led up to this historic milestone.

The *Imagine You Were There...* series celebrates events that changed the world and the people who made them happen. 2019 sees the 50th anniversary of the Apollo 11 Moon landing, and *Walking on the Moon* celebrates this milestone by helping readers imagine what it was like to actually be there. Blended with stunning photographs and lively artwork, the book includes step-by-step details of events leading up to the mission, eyewitness accounts, and features on people who helped make the first Moon landings happen, including many of the hundreds of dedicated people working "behind the scenes" at NASA.

Caryn Jenner writes and edits a variety of books for children of all ages, including both fiction and nonfiction. Her picture book, *Starting School*, was one of the eight books longlisted for the UK's 2012 School Library Association Information Book Award in the Under 7 age group. Caryn also teaches English to speakers of other languages and volunteers at a local school. She grew up in the United States but has made her home in the UK for many years.

CARYN JENNER**Winning the Vote for Women****JUNE**

Kingfisher

Juvenile Nonfiction / Biography & Autobiography / Women

On Sale 6/11/2019

Ages 7 to 11

Hardcover with dust jacket 64 pages

12 in H | 9.5 in W

Carton Quantity: 0

ISBN: 9780753475010

\$14.99

Imagine you were there campaigning for women's right to vote. Celebrate the 100th anniversary of this historic milestone by reading about the people and worldwide events that led to the 19th Amendment giving American women the right to vote.

The *Imagine You Were There...* series celebrates events that changed the world and the people who made them happen. 2019 sees the 100th anniversary of the passing of the 19th Amendment giving women the vote in the United States. *Winning the Vote for Women* celebrates this milestone by helping readers imagine what it was like to be there. Blended with stunning photographs and lively artwork, the book looks at the start of the women's suffrage movement under Elizabeth Cady Stanton and Susan B. Anthony. It includes details of events leading up to passing of the historic Amendment, how women campaigned (and won) in other countries, eyewitness accounts of the suffragettes and their harsh treatment by the authorities, and features on the women and men who helped change history.

Caryn Jenner writes and edits a variety of books for children of all ages, including both fiction and nonfiction. Her picture book, *Starting School*, was one of the eight books longlisted for the UK's 2012 School Library Association Information Book Award in the Under 7 age group. JUDY ALLEN

Are You a Beetle?

MAY

Kingfisher

Juvenile Nonfiction / Animals / Insects, Spiders, Etc.

On Sale 5/14/2019

Ages 5 to 8

Trade Paperback 32 pages

8.3 in H | 8.3 in W

Carton Quantity: 0

ISBN: 9780753474914

\$7.99 / \$10.50 Can.

Can you find a six-spotted tiger beetle in your own backyard? Read about the everyday life of this sharp-jawed garden beetle.

Did you know the six-spotted tiger beetle is one of around 400,000 types of beetle in the world? A six-spotted tiger beetle is bright metallic green and, like the tiger, it has sharp and very powerful jaws! *Are you a Beetle?* will give young children an inside look at the everyday life of this fascinating insect. They can find out where the mother beetle buries her eggs, how the egg hatches into a tiny caterpillar, how the adult beetles grab passing ants and spiders to eat from the safety of their burrow, and much more.

Judy Allen has written over 50 books for children, both fiction and non-fiction. In the UK she has won the Children's Section of the Whitbread Award (now the Costa), of the Christopher Medal and of the Friends of the Earth Earthworm Award. She is especially interested in wildlife, both large and small, and believes it is important (as well as fun) to encourage children to be interested too.

MAY

Kingfisher

Juvenile Nonfiction / Animals / Insects, Spiders, Etc.

On Sale 5/14/2019

Ages 5 to 8

Trade Paperback 32 pages

8.3 in H | 8.3 in W

Carton Quantity: 0

ISBN: 9780753474921

\$7.99 / \$10.50 Can.

Can you find a centipede in your own backyard? Read about the everyday life of this fascinating multi-legged insect.

Did you know there are around 8,000 types of centipede in the world? The name "centipede" means 100 feet, although not every centipede has that many feet. And centipedes can't count anyway! *Are You a Centipede?* will give young children an inside look at the everyday life of this fascinating insect. They can find out why the female centipede is such a good mother, what happens when her eggs hatch, how centipedes can run very fast to catch insects and small spiders to eat, and what the difference is between a centipede and a millipede.

Judy Allen has written over 50 books for children, both fiction and non-fiction. In the UK she has won the Children's Section of the Whitbread Award (now the Costa), of the Christopher Medal and of the Friends of the Earth Earthworm Award. THE CODER SCHOOL

Coding with Basher: Code Your Own Website

JULY

Kingfisher

Juvenile Nonfiction / Computers / Programming

On Sale 7/23/2019

Ages 7 to 11

Trade Paperback 96 pages

0.4 in H | 0.3 in W

Carton Quantity: 0

ISBN: 9780753475126

\$9.99 / \$12.99 Can.

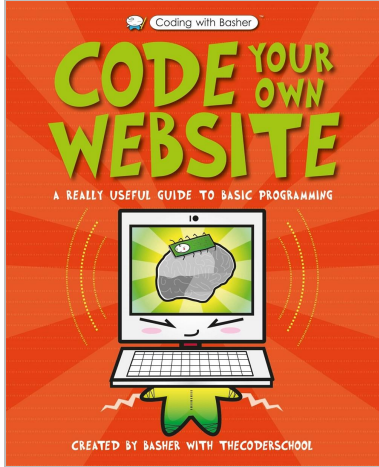

Basher's step-by-step manual showing children how to create their own website

One of two new books in the brand-new Basher series Coding with Basher. These books combine Basher's trademark quirky and humorous illustration style with the very latest teachings on coding with the Scratch program from the founders of the Coder School. Code Your Own Website builds on the skills learned from Coding with Scratch and shows them to to code their own website using the three web languages of HTML, CSS, and Javascript. The book is a fun, engaging and easy to use approach to creating a website with the help of today's most popular coding teaching tool, Scratch, used in over 150 countries and available in more than 40 languages.

The Coder School, founded in 2014 and based in Silicon Valley, was started by two childhood friends who spotted a gap in the market when looking for a coding school for their own children. With schools in 20 locations, growing at a projected rate of 10–15 new ones per year, and summer camps across the US, on a weekly basis they teach over 2000 kids how to code with infectious humour, enthusiasm, and a sense of fun.

Learn how to become a vet in this exciting title! Packed with bitesize information and fun facts about the life of a veterinarian, *Vet in Training* will tell you all about habitats, food cycles, pets and exotic animals.

Simple activities will test your skills and reinforce the information you read in the book. Can you spot the sick lion in the wildlife park? Or tell when a dog is happy or sad? Or even discover how to give a turtle a bath? Look inside to find out!

Catherine Ard has always loved to read books and write stories. She studied French and English at university and got her first job in London writing children's comics. She has written and edited many reading, activity, craft, and reference books for children. She now lives in Bristol with her family and their dog, Annie, who sleeps by her feet while she is working.

Carton Quantity: 0

ISBN: 9780753475034

\$14.99 / \$19.50 Can.

An engaging first art book that introduces young children to the joys of looking at, and understanding, works of art

This simple, engaging introduction to art combines superb reproductions of an imaginative selection of artworks by artists ranging from Rousseau and Seurat to Mondrian and Van Gogh. With beautifully pitched text supported by friendly cartoon-style illustrations, *Who's in the Picture?* invites young children to search for particular people or animals or other detail in the paintings displayed. Further questions encourage children to examine each artwork and to explain, very simply, what is happening in the pictures.

Susie Brooks has a first-class history of art degree and has worked as an editor and writer of children's non-fiction and picture books for over ten years. She is the creator of the award-winning *Get into Art: Animals* book and its three companion titles (*People*, *Places*, *Telling Stories*). She is an artist herself and runs art workshops for young children. She lives in Edinburgh, Scotland.

KINGFISHER READERS

This is a dynamic series that hooks the interest of emerging readers with irresistible topics and guides them through five levels of increasing reading challenges as they build confidence and progress toward reading alone. Each book in the series is carefully designed with natural sounding language, visually exciting images, and a layout that makes the narrative flow naturally.

6 x 9 • Ages 5 to 8 • Grades K-3 • L1 – L4 32pp. / L5 48pp. • PB \$3.99 (\$5.25 CAN) **GRL = Guided Reading Level***

IN TRAINING

In Training is an engaging new series that puts readers in the middle of the action of some of the most popular STEM-related jobs. The interactive books introduce children to the real-life processes and techniques of each profession by explaining each job in detail and asking questions that will be answered as readers work their way through the practical information, innovations, and facts. Content area vocabulary, thought-provoking queries, as well as hands-on activities and quizzes also appear throughout each book.

A perfect addition to any STEM program. In Training is a great resource to spotlight the essential skills needed for these important jobs in an exciting, accessible, and refreshing new way!

The U.S. needs 1 million more STEM professionals over the next decade than it is projected to produce at the current rate.
—ACT Report: STEM Education in the US, 2017

In Training meets NSTA's criteria for the best STEM literature for young readers on multiple key points.

Scientific activities and experiments promote creativity, teamwork, and cooperation

Questions offer the opportunity for exploring multiple solutions, working through the process of trial and error, and analyzing results

PRACTICAL 9
INVISIBLE FORCES
Ready for some science magic? Some forces are invisible. They can move objects without touching them!

MAGNETS
A magnet is a piece of metal that can pull some types of metal toward it. Metals that stick to a magnet are magnetic.

Use a fridge magnet to test these objects to see if they are magnetic.

IS IT MAGNETIC?	Y or N?
book	N
fork	Y
paperclip	Y
eraser	N
saucepan	Y
aluminum foil	Y
glass	N
coin	N

GRAVITY
Gravity is the invisible force that keeps your feet on the ground. When you jump up in the air, you fall back down again. That's because Earth is pulling you toward its surface.

EXPERIMENT
1. Take a piece of thread and tie one end to a paperclip and the other end to a pencil.
2. Hold the pencil straight, and the paperclip points down because gravity is pulling it. What happens if you tilt the pencil?

Spotlights authentic experiences of, and skills needed for, STEM-focused careers

PRACTICAL 3
PREPARE FOR LIFT-OFF!
Hooray! Launch day has finally arrived. There's a lot to do before you blast into space but the countdown clock is already ticking...

GROUND CHECKS
While the ground crew and control room are busy checking the weather and preparing the rocket, you will be busy, too.

LAUNCH CHECKLIST

- Do an interview for the TV reporters.
- Put on the special suit you need to wear for launch and landing.
- Travel to the rocket in the Astrovan. (It's just a van for the astronauts!)
- Wave goodbye to your family, friends and fans.
- Take the lift to the top of the launch tower.
- Strap into your comfy seat in the tiny space module.

COUNTDOWN
The countdown happens backwards. So "1 minus 2 minutes" means there are 2 minutes left until launch. The last ten seconds of the countdown are done on a loud speaker: ten, nine, eight, seven, six, five...

LIFT-OFF!
Hear the rumbling roar as the engines start up. Feel the rocket shake as it blasts off and gathers speed...

PRACTICAL NO. 3
ORBIT
APPROVED
Fuel tank falls off and nose cone breaks away.

FALL OFF!
You will hear loud BANGS as parts of the rocket fall away. Don't panic! The astronauts are safe in the tiny module at the top. The fuel tanks, nose cone and other parts fall away when they have done their job.

Highlights real-life innovation

Find the In Training series on pages 38–39

THEORY 4
THE SOLAR SYSTEM
The Solar System is made up of the Sun and the eight planets that travel around it. The Earth is one of them!

ROCK OR GAS?
Mercury, Venus, Earth and Mars are made of rock, but Jupiter, Saturn, Uranus and Neptune are big balls of gas. If you stood on a gas planet, you'd fall straight through!

TOP TIP!
Remember the order of the planets in the Solar System with a silly sentence. The first letter of each word stands for a planet.
Meet Very Excited Martians Joyfully Slurping Up Noodles
Mercury Venus Earth Mars Jupiter Saturn Uranus Neptune
Now make up a sentence of your own.
M _ V _ E _ M _ J _ S _ U _ N _

MERCURY	VENUS	EARTH	MARS	JUPITER	SATURN	URANUS	NEPTUNE
Bubbling hot	Too hot	Perfect temperature	Too cold	Cooler	Colder still	Brrr	Freezing cold
The side that faces the Sun is roasting hot. The other side is r-f-r-freezing.	This hot planet is covered with thick clouds and extinct volcanoes.	Our planet is the only one where animals and plants can live.	This red planet is of ten covered in swirling dust storms.	This is the largest planet in the Solar System. It has 67 moons.	This planet is surrounded by rings of rock and ice.	Uranus is made of icy material that flows around its rocky centre.	This icy blue planet has the strongest winds in the Solar System.

Diagrams point out content area facts, figures, and feature specialized vocabulary

Basher Science books promote technical literacy, engage students while they're learning, and create excitement about STEM subjects! They are the perfect books to seamlessly supplement and integrate into your real-world STEM-based curriculum.

The acronym STEM (Science, Technology, Engineering, and Math) was first coined over 20 years ago when it was discovered that STEM-focused jobs were growing faster than non-STEM jobs. It was found that many US-educated job applicants lacked the skills necessary to acquire these roles. Since then, educators have been working to improve the amount of STEM courses available in order to ensure graduates are equipped with the skills necessary to attain these jobs in the future.

Basher Science books promote...

Technology

Light Bulb

Rotor

Students need to study technological achievements of the past in order to create technological advancements of the future. A strong knowledge of technology and how things work, as well as a background in real-world design, invention, and innovation, are only a few things today's students need to succeed in this field.

Basher Science: Technology does all this and more, by revealing the secrets behind the devices we take for granted and the amazing inventions that have transformed our lives. It is a compelling guide to the big-bytes whiz-kids, powerhouse motors, and other characters who drive our inventive and highly scientific world.

“Not enough U.S. students are equipped for STEM opportunities—now or in the future.”

—ACT Report: STEM Education in the US, 2017

Basher Science books promote...

Engineering

Arch

Microchip

Engineering isn't just hard hats and construction sites! It's a highly interdisciplinary and creative discipline with opportunities to improve people's lives in all kinds of ways. Budding engineers need models of real-world innovation that they can comprehend.

Basher Science: Engineering explains these difficult engineering concepts in ingenious ways, making them tangible and understandable. Basher's chatty, first-person text and stylish, contemporary characters give a voice, personality, and story to each engineering topic that children are unlikely to forget.

Basher Science books promote...

Math

Decimal

Cone

Math is essential to STEM education because it assists in such areas as solving problems, analyzing data, proving theorems, finding solutions, measuring outcomes, as well as aiding in many other scientific processes.

Basher Science: Algebra and Geometry brings mathematical concepts to life by inviting readers to discover the secrets of characters such as Cone, Decimal, and Tangent and how they like to throw their numbers about. This engaging and tongue-and-cheek approach to explaining important mathematical concepts brings a whole new spin to the world of higher math.

Basher Science books promote...

Science

A knowledge of the basic principles of science is essential, and Basher Science's award-winning books do that in a fun and unique way! With over 3 million books sold, Basher has changed the way kids learn about and study science. This one-of-a-kind visual nonfiction series makes STEM learning accessible by helping children discover the latest information from the scientific world while keeping them entertained and coming back for more.

Find the Basher series on page 42–43

A Hands-on Basher STEM Activity!

We know that many of today's STEM-minded people will become genuine inventors of tomorrow. Help your students become inventors too with **this creative and cooperative STEM-focused classroom activity.**

Put students in teams and have them look through the Basher Science books to find a science topic that interests them. Then ask them to invent something related to that scientific field. As a team, have them research their subject area, and then decide on one invention that is currently missing from the field. Examples could be a jet-pack for dogs, a skyscraper that reaches the Moon, or an underwater city. Ask them to explore multiple ideas before they settle on the one they think would be the most plausible and achievable to create in real life.

After they settle on their inventions, students should develop presentations that illustrate their prototypes in the Basher style, as well as write a paragraph of the invention in Basher voice for the Basher Science book it would most likely be featured in. Invite faculty staff to listen to the Basher Science inventions and vote to “invest” in the project they think is the most beneficial to the scientific community.

Put the fun in learning fundamental concepts and skills with critically acclaimed Basher Basics books.

Basher Basics STEM

7 x 7 • Ages 8 up • Grades 3 up • 64 pp.

Creative Writing: The Plot Thickens
