Emily and Matt, founders of the food blog Nerds with Knives, go beyond wine and beer and introduce rich flavor profiles with sake, vodka, gin, sherry, brandy, whiskey, bourbon and rum. Though their recipes are up-scale—like Pork Tenderloin with Mustard and Whiskey, and Chicken Liver Pate with Brandy and Thyme—their no-nonsense approach to cooking is down to earth, refreshingly candid and approachable.

Other recipes include Pinot Noir Caramel, where the pinot adds a sophisticated and slightly tart edge to the sweetness of the caramel; Chicken Roasted with Sake, Scallions and Ginger, where the sake not only adds a mild floral note, but also helps to tenderize the meat; and Wild Mushroom Crostini with Sherry and Ricotta. Emily and Matt stress that this is a match made in heaven, where the nutty notes in a good dry sherry bring out the earthiness you find in wild mushrooms.

This book will include 75 recipes and 75 full-color photographs.

Emma Vanstone

Children can learn about geology, DNA, states of matter, buoyancy and more in a fun—and tasty—way.

Now, kids can have a snack while learning a thing or two about science with Emma Vanstone’s edible science experiments.

Curious kids will learn about liquid density by making layered popsicles, simulate how earthquakes affect buildings on different kinds of foundations using Jell-O and brownies and give their engineering skills a go by building bridges out of egg shells. Parents can rest easy knowing that their kids are learning and indulging their inquisitive natures using safe materials.

Each experiment investigates and explains a different scientific principle using ingredients found right in your kitchen. And the best part is that after kids have built up an appetite exercising their scientific muscles, they will already have a snack just waiting to be eaten.
